**DECLARATION OF LIANG-JU LU IN
SUPPORT OF REISSUE APPLICATION**

I, Liang-Ju Lu, declare as follows:

1. I am a citizen of the People's Republic of China residing at 15815 Scenic Heights Road, Eden Prairie, Minnesota 55344. I believe that I am the original and first inventor, of the invention described and claimed in U.S. Patent No. 5,971,625, granted on October 26, 1999, and described and claimed in the accompanying application for which I solicit a reissue patent.

2. I have reviewed and understand the contents of the specification and claims of this application, including reissue claims 18-22 added by amendment filed with this declaration.

3. I acknowledge the duty to disclose information which is material to the examination of this application in accordance with 37 C.F.R. § 1.56.

4. I believe the above-identified patent is partly inoperative by reason of claiming less than I had a right to claim in the patent. Such inoperativeness includes the failure to prosecute

and obtain claims commensurate with the scope of new claims 18-22 added by this reissue application.

5. It was an error to fail to include in the above-identified patent, claims that are directed to an optical fiber connector assembly including an adapter having an adapter housing with two sleeves for receiving two ferrules of a connector and where the adapter housing includes an outer perimeter defining an SC footprint.

6. All of the errors being corrected in the reissue application up to the time of filing this declaration arose without any deceptive intention on the part of the Applicant.

7. I do hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of the Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.
